Hartford, CT 06106

No Bid/No RFP VOIP Telephone Solutions for Municipalities, Schools, and Libraries.

Through the CRCOG state contract, your municipality can access VOIP solutions through IP Genie—a CCI Voice company—without the hassle of going to bid or conducting an RFP. This partnership offers advanced technology, significant cost savings, and simplified communications for Connecticut towns.

Why Municipalities Choose Our VOIP:

1. Cost Savings That Add Up Quickly

With CRCOG's negotiated pricing, many towns find that the savings on line fees alone cover initial investments in short order. The reduced capital expense and lower total cost of ownership make our VOIP a financially smart choice.

2. Reliable Technology Without the Hassle

Traditional phone systems come with expensive hardware, high line fees, and limited features. VOIP eliminates the need for bulky equipment and costly phone lines. Instead, it uses your existing internet connection and office network to deliver clear, secure, and dependable phone service at a fraction of the cost.

3. Easy Integration with Enhanced Features

Leverage your existing internet connection for robust VOIP, and enjoy features like web and video conferencing, hot desking, "find me, follow me," and more—all designed to enhance efficiency and flexibility in your municipal offices.

4. A Trusted Local Partner

Because we're based in Connecticut, you gain access to our dedicated team of local service technicians who are always available for fast, responsive support whenever you need it. Our systems are built with multiple layers of failover and backup, ensuring your town's communication stays up and running—even during outages or emergencies. You can count on continuous, secure service without interruptions.

Get Started Today

Upgrade your town's communication system—experience immediate savings, advanced features, and a system built for the future.
